

BUY POKER

THE FAST PACED CARD GAME – YOU SNOOZE YOU LOSE!

ABISHEK PURI, HONG JOON CHOI

Gameplay

Dive into Texas Hold'em based card game and compete against other players in auction!

- Round and points system
- Player credits and upgrade store
- In-game power-ups
- Custom game mode
- Auto matched 1vs1 multiplayer mode

Artificial Intelligence

5 main factors involved in AI

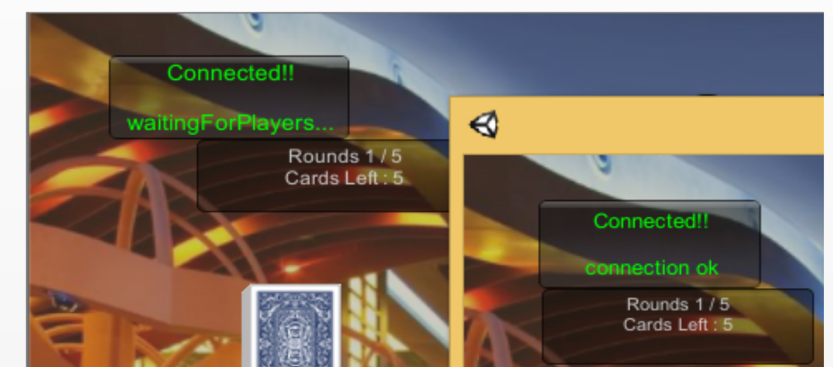

- prediction of other cards
- aggression factor
- bluff factor
- value of current card
- cash on hand

Core AI Calculations

$$Value(Card) = \frac{Players}{Players + 1} \frac{HandWithCard}{TotalHands} + Aggression$$

$$BidValue(Card) = \text{Max}[Value(Card), Bluff] \times Cash$$

Networking

Match up against players online and showcase your skill!

State synchronization

Core game events are synchronized by host to ensure that all players online are playing the same game.

Interpolation and latency hiding

Hides the effect of transmission delay and data loss
